MASONRY CEMENT TYPE N

TITAN AMERICA® Type N Masonry Cement has a proven track record on many applications including stucco, mortar for concrete block, clay brick, glass block, stone and decorative masonry jobs. Its qualities are pleasing to designers, masons, and property owners.

- Extensively tested
- Controlled production
- Superb workability
- Excellent crack reduction qualities
- Characteristics desired by masons
RECOMMENDED USES
Titan America® Masonry Cement Type N is a general purpose masonry cement. Type N Masonry Cement consistency is specifically designed for use in abovegrade unit masonry applications with products such as concrete block, clay brick, glass block and stone.

SPECIFICATIONS AND QUALITIES
Titan America® Masonry Cement is a top quality, multi-purpose product formulated with finely ground Portland cement and special admixtures to meet a wide variety of job requirements. The qualities of the cement include: workability, sand-carrying capacity, adhesiveness, water retention and setting time. Titan America® Masonry Cement Type N when mixed and tested according to the property specifications section of ASTM C-270, will meet the strength requirements for Type N Masonry Cement. Titan America® Masonry Cement Type N meets or exceeds the requirements of ASTM C-91.

- No allowances for waste, aggregate size or field conditions.
- One bag of Masonry Cement is approximately one cubic foot by volume.
- Approximately 6 #2 shovels of damp, loose sand equals one cubic foot by volume.
- Actual coverage will vary.

CEMENT PREPARATION
Titan America® Masonry Cement Type N will not perform as designed if the mixing instructions and proportions are not followed correctly. It is important to ensure that the product does not dry out prematurely; this condition can affect overall strength and durability of the finished product. Mix mortar in a mechanical mixer as follows:
1) Add approximately 2/3 of the potable water required.
2) Add 1/2 of the sand (ASTM C-144 approved) required.
3) Add Titan America® Masonry Cement Type N.
4) Add the remainder of the sand (ASTM C-144 approved).
5) Add enough potable water to bring the mortar to the desired consistency.
6) Allow mortar to mix 5 minutes from the introduction of the last ingredient.

ACCESSORY PRODUCTS
The water and aggregate used in the mixing process should be free of any substance that could adversely affect the hardened masonry or any metal accessories used in the system.

CAUTION
Causes skin irritation, injurious to eyes. Contains Portland Cement. Freshly mixed cement, mortar, concrete or grout may cause skin injury. Avoid contact with skin where possible and wash exposed skin areas promptly with water. If any cement or cement mixtures get into the eyes, rinse immediately and repeatedly with water for 15 minutes and get prompt medical attention.
